

Medical cables ECG electrodes SpO2 sensors

Product catalogue 2025

Welcome to the world of electromedicine!

SORIMEX

About us

Decades of Expertise in ECG Electrodes and Medical Cables

For over 35 years, we have been a trusted manufacturer of ECG electrodes and medical cables, as well as a supplier of other medical accessories. Our products, based on modern technology and extensive engineering experience, are used in diagnostics, treatment, and various medical procedures.

Custom Solutions for Medical Device Manufacturers

We are ready to meet the needs of medical device manufacturers and distributors, offering both standard products and customized solutions tailored to individual requirements. Our production capabilities allow for quick and precise fulfillment of orders.

Quality Assurance and OEM Customization

Quality and comprehensive support are our top priorities throughout every stage of cooperation—from concept and design to the final product. We also offer product customization under OEM agreements to meet specific customer expectations.

Looking for custom ECG electrodes or medical cables tailored to your device? Contact us for personalized solutions at export@sorimex.eu.

hydrogel
PET paper

EK-T 3413SG TAB
X-RAY, MRI

34 x 13 mm
hydrogel
PET paper

TAB electrodes are dedicated mostly for short term resting ECG procedures. They are easy for application and comfortable to wear. TAB electrode is the best choice for medical transport. Using disposable electrodes reduces the risk of cross-contamination.

Catalogue number	Dimensions	Gel	Base material	Patient group
EK-S 22 PSG	46 x 22.5 mm	solid gel	polyethylene foam	neonates pediatric
EK-S 30 PSG	ø 30 mm	solid gel	polyethylene foam	neonates pediatric

EK-S 55 P

ø 55 mm
liquid gel
polyethylene foam

The circular shape of the ECG electrodes provides a larger contact area with the skin, improving the quality and accuracy of the ECG signal while increasing patient comfort. Thanks to the use of carbon snap, the EK-S 30 PSG RTG and EK-S 45 PSG RTG ECG electrodes are invisible in X-rays, allowing radiological examinations to be conducted without removing the electrodes.

Catalogue number	Dimensions	Gel	Base material	Patient group
EK-S 25 PSG	ø 25.7 mm	solid gel	polyethylene foam	neonates pediatric
EK-S 30 PSG RTG	ø 30 mm	solid gel	polyethylene foam	neonates pediatric

X-RAY

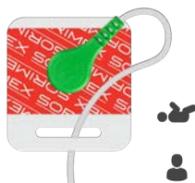

23 x 23 mm
hydrogel
perforated
non-woven fabric

Pre-wired neonatal electrodes with a specialized hydrogel are invaluable in incubators enabling multiple repositioning during patient care. They remain invisible in X-rays, facilitating radiological examinations without electrode removal. Compatible with DIN 1.5 mm socketed ECG cables such as EK-1/23.

Catalogue number	Dimensions	Gel	Base material	Patient group
EK-S 61 PSG	55 x 53 mm	solid gel	polyethylene foam	adults

liquid gel
polyethylene foam

The unique cutout in the ECG electrodes allows for the attachment of the electrode and connecting wires in a durable and patient-friendly manner, ensuring stability and continuous transmission of the ECG signal.

Thanks to the gentle fabric, the EK-S 50 NWSG electrode fits perfectly to the body's curves and allows the skin to breathe freely throughout the entire examination. It is designed for individuals who are particularly active, experience excessive sweating, or are overweight.

MEDICAL CABLES

Your Reliable Partner in Medical Cable and Leadwire Production

Our medical cables are essential for transmitting signals between patients and medical devices, playing a crucial role in diagnostics and monitoring. High quality and precision engineering ensure reliable performance in various applications.

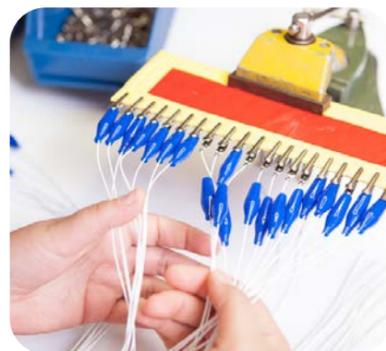

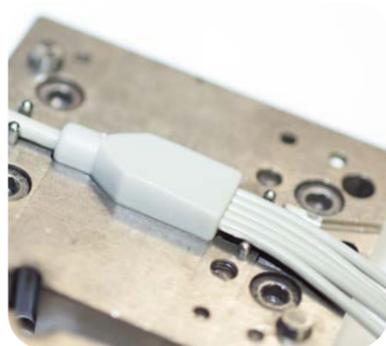

We offer a wide range of medical cable solutions:

- cables for ECG, EEG, EMG and monitoring systems
- leadwires compatible with various switching systems
- wide range of patient-side connectors
- extensive compatibility with most medical devices
- customizable cable printing
- sterilization available for use in operating rooms
- and much more...

- 100.000+** Annual production capacity for cables & wires
- >1000** Active generic and project cable SKUs in the order
- 330** Active SKUs for custom-made cables in our offering
- 75** Satisfied clients for custom-made cables
- 20** Ongoing projects for manufacturers under development and production
- 15** Fully equipped cable processing workstations
- 3** High-efficiency injection molding machines

SORIMEX

Customized cables and leadwires for medical devices

35 years of experience
High trained staff

EU based
Advising approach

Trusted partner for big manufacturers
ISO 13845 certified

Agility and flexibility

SORIMEX

SpO2 measurement

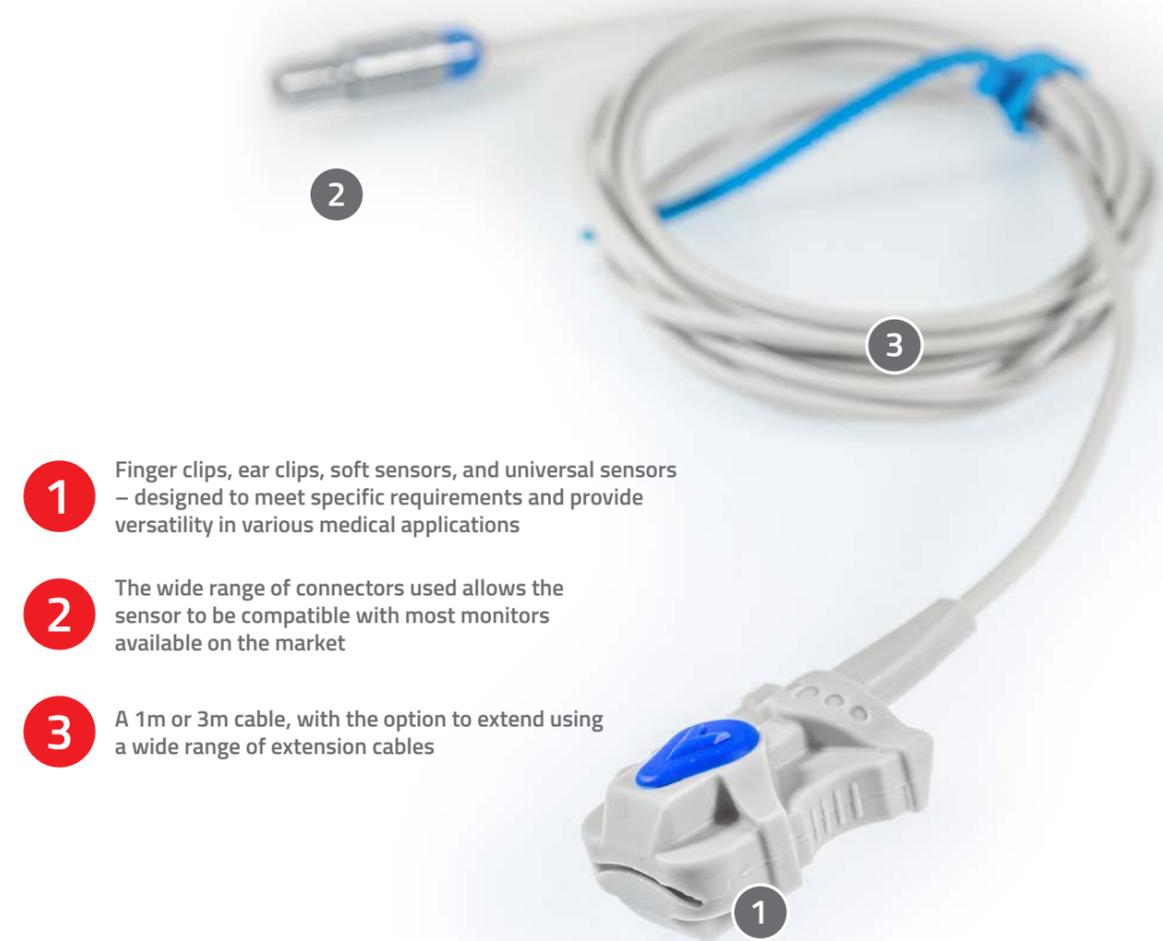

Discover our
SpO2 measurement

SpO2 sensors measure blood oxygen saturation and heart rate, perfect for use during oxygen therapy, anesthesia, and emergency care. Available in disposable and reusable versions, they offer non-invasive, reliable monitoring for all patient types, from newborns to seniors.

Key features:

- Compatible with major brands like Nellcor, Philips, Mindray, GE, and more
- Variety of connectors: finger clips, ear clips, soft sensors, and others
- Extension cables and adapters for secure, comfortable attachment

Choose precision and comfort with our tailored SpO2 solutions.

- 1** Finger clips, ear clips, soft sensors, and universal sensors – designed to meet specific requirements and provide versatility in various medical applications
- 2** The wide range of connectors used allows the sensor to be compatible with most monitors available on the market
- 3** A 1m or 3m cable, with the option to extend using a wide range of extension cables

Patient-end connector types

Reusable SpO2sensors

- finger clip
- ear clip
- soft
- multi-site

Disposable SpO2 sensors

- adhesive foam
- adhesive textile
- non-adhesive sponge

Compatibility

- Nellcor
- Nellcor OxiMax
- Philips
- BCI
- Biolight
- Masimo
- Mindray
- Nihon Kohden
- Nonin
- Novamatrix
- Contec
- Dräger / Siemens
- GE Datex Ohmeda
- GE OxyTip+
- GE TruSat
